

# Introduction to Applied Pediatric Nutrition

## Hasbro Children's — Providence, RI

### Friday, April 11, 2025

#### Course Overview:

This course will provide health professionals (RDN, DTR and / or dietetics student) with current information on pediatric nutrition.

Knowledge obtained from this course will provide the participant with:

- Pediatric nutrition assessment and interview techniques.
- Introduction to pediatric Inflammatory Bowel Disease.
- Review of infant & pediatric enteral formulas and feedings.
- Review common pediatric conditions (Cow's Milk Allergy, diabetes, eating disorders, ARFID), explore nutrition treatment impact.

**Program will be submitted for 6.5 Level 2 CPE's through the Commission on Dietetic Registration**

#### Learning Objectives:

- Select and utilize appropriate nutrition assessment and interview tools to guide assessment, intervention and management of pediatric nutrition in acute care settings.
- State the fundamentals of infant and pediatric enteral formula composition and applications for use.
- Summarize key nutrition considerations for pediatric inflammatory bowel disease, diabetes, cow's milk allergy, eating disorders and ARFID.
