

WHAT is **SUCCESS**

SUCCESS provides infant and early childhood mental health consultation (IECMHC) throughout Rhode Island. IECMHC promotes nurturing relationships and enhances the capacity of staff, families, programs, and systems to prevent, identify, and address the social, emotional, and behavioral health needs of young children (0-5 years).

SUCCESS offers a variety of free services to ensure all children have access to a supportive early learning environment.

our STAFF

SUCCESS is staffed by Infant and Early Childhood Mental Health Consultants employed by Bradley Hospital. Our consultants are graduate-level professionals who have expertise in early childhood mental health and experience providing consultation to early learning programs.

Child-focused Consultation

success supports the needs of individual children by helping caregivers understand, contextualize, and address the child's social and emotional needs. SUCCESS works with families and early learning staff to develop and implement an individualized plan. Early learning programs and families must agree to all individual child referrals.

Child-focused consultation includes:

- Observation, standardized questionnaires, and conversations with program staff and the child's caregivers
- Feedback, recommendations, and collaborative planning to identify strategies and supports
- Follow-up consultation, including:
 - Supporting staff to implement individualized strategies to meet the child's needs
 - Helping families connect to community supports and services

Do you have concerns about a child's ability to:

- Express and manage strong feelings?
- Follow classroom rules and meet expectations?
- Be flexible and adjust to change?
- Get along with peers?
- Get along with adults?
- Build confidence in their ability to learn and play independently?
- Focus and wait their turn?
- Communicate clearly?
- Develop and express a sense of self, identity, and belonging?
- Adjust to stressful life events and transitions?

If you answer **YES** to any of these questions, consider **SUCCESS**.
